

# Storyboard 2: Iteration 1

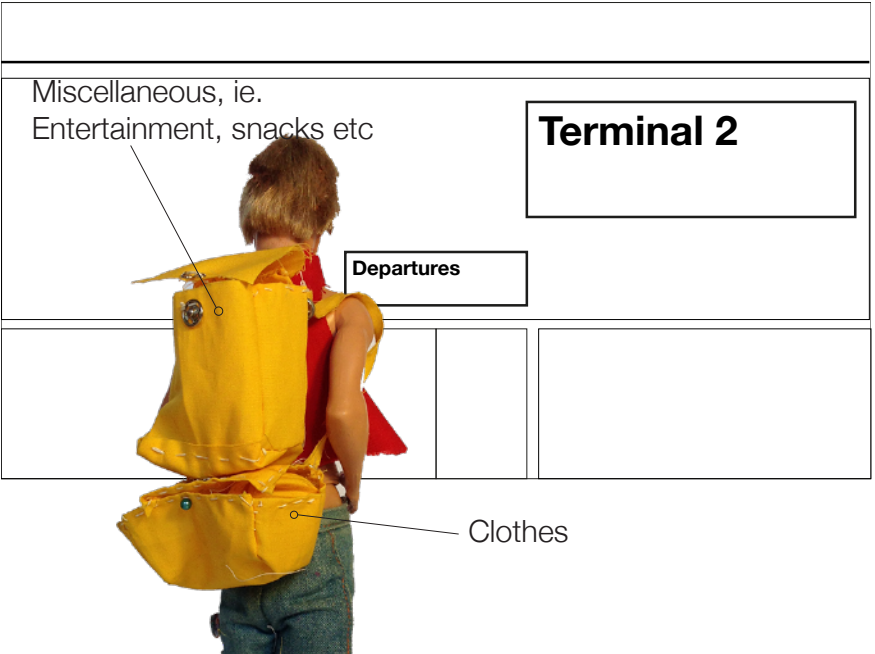

**1. Morning of trip**  
Ken is sleeping.

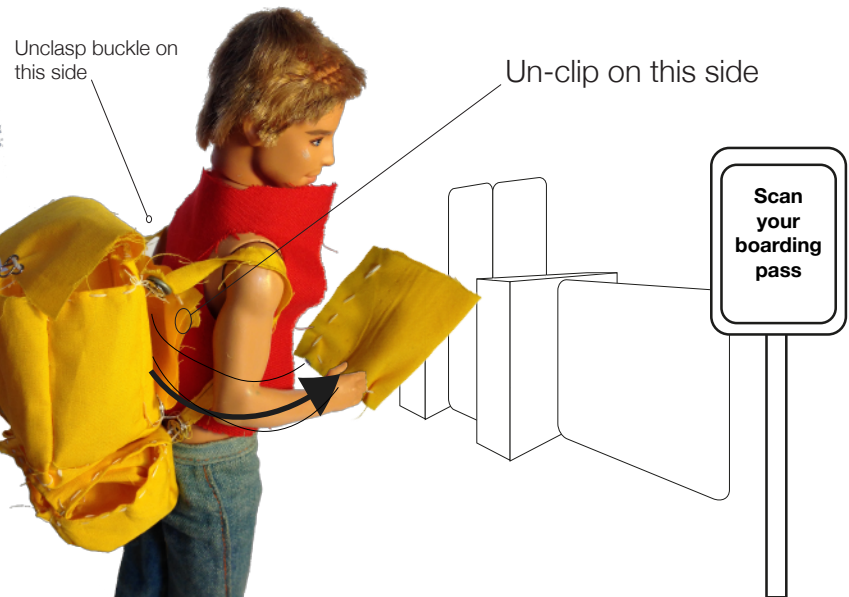

**3. Scan boarding pass**  
Important documents and laptop are in micro fleece lined section behind back.

**5. Easy access to clear liquids bag**  
Clear liquids are on inside of lid to bag for easy access.

**2. Goes to airport**  
Has clothes in bottom section and miscellaneous things like books or snacks in upper section.

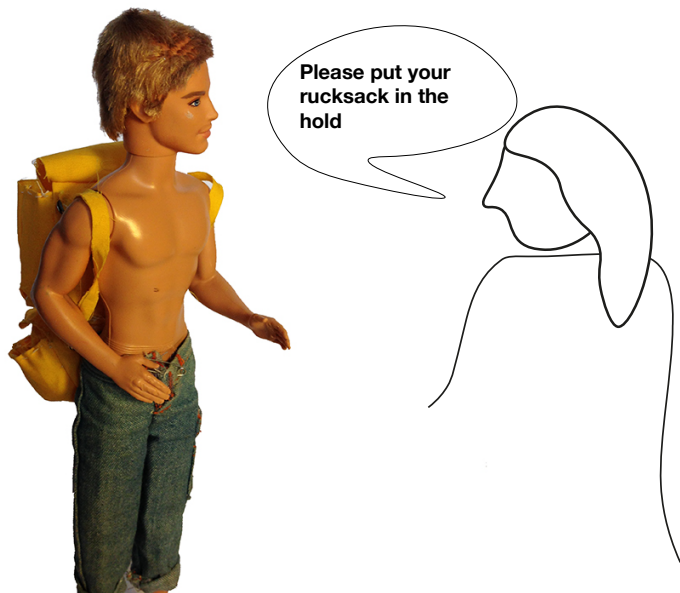

**4. Scan boarding pass**  
Unclipping on oneside and pulling out on other provides easy access to important docs and laptop.

**6. Waiting on plane gets too**  
Removes jacket and straps on to bag.

# Storyboard 2: Iteration 1

## 7. Boarding plane.

Told to put rucksack in the hold.

Only room for 90 maximum sized bags, apparently quarter of people asked to put bag in hold

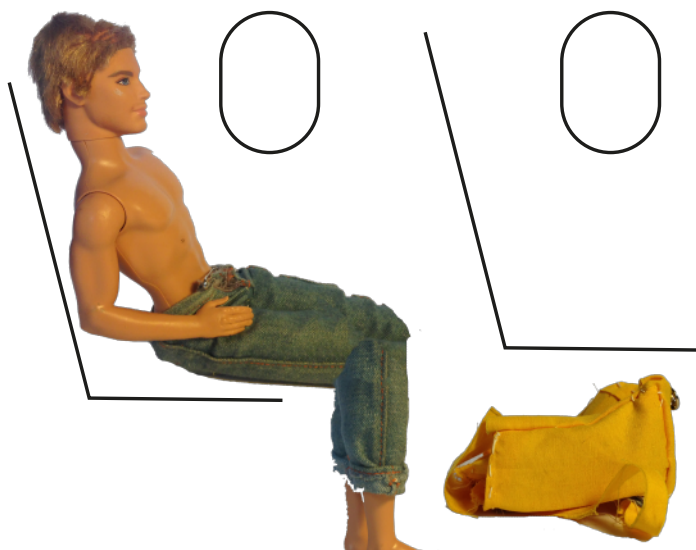

## 8. Dimensional restrictions

The boeing 737 only has a capacity for 90 maximum sized (500x400x200) despite there being 189 seats. Apparently a quarter of respondents to a survey had to put their bags in the hold.

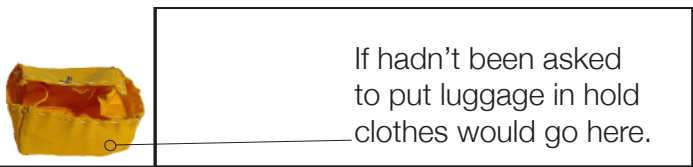

## 8. Dimesnional restrictions

So the complete bag could be the maximum size and the bag without clothes could be the average size.

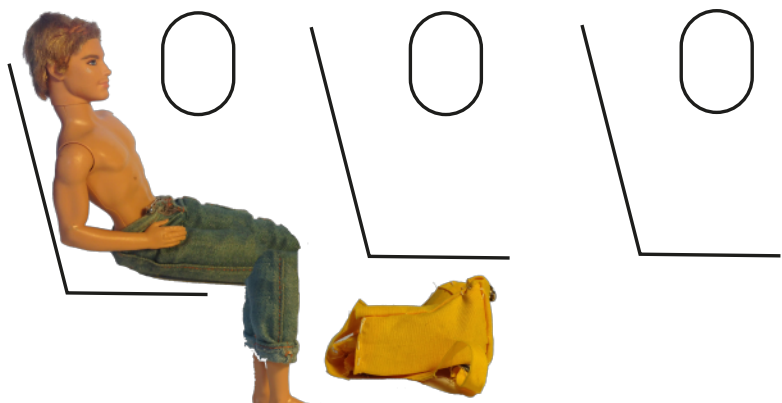

## 9. On the plane

The day bag would be able to go under seat for easy access to snacks and books etc. Perhaps there should be an even smaller section that is removable and easier to keep on your person?

## 9. On the plane

If clothes hadn't been put in the hold then clothes section could go in the over head storage and the things you need easy access to can go at feet.

## 10. Passport control.

Easy access to important docs like passport as described on 3 and 4.

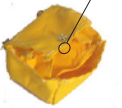

# Storyboard 2: Iteration 1

Takes day bag out

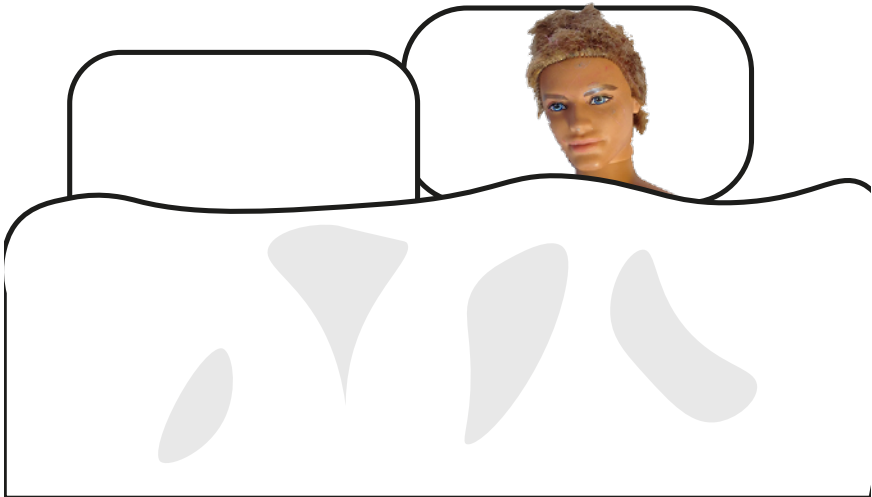

Leaves clothes at accommodation

**11. Arrived at accommodation and going out for the day**  
Can leave clothes at home and only carry what he needs.

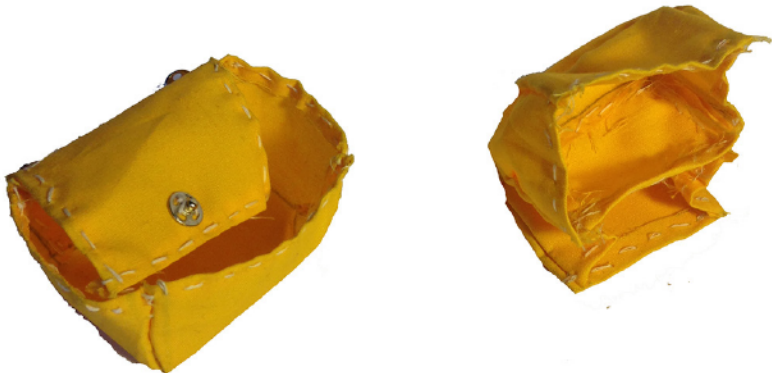

Zzzzz  
Zzzzz  
Zzzzz

**12. sleeping.**

**13. get dressed**  
Clothes are in clothes section in two collapsible shelves.

**14. There are two sets of collapsable shelves**  
One for clean and one for dirty. Shelves collapse like hanging shelves. Keeps clothes organised.

To the beach

Camera, food etc..

Things that would get wet and sandy

**15. day out, to the beach?**  
Food and camera etc are in top section. The shelves from clothes section with clothes have been removed leaving the bottom section empty so that it can be used for wet sandy things like towels or swimming gear.
